3 Church Street, E15 3HU, London, UK

## OBJECTIVE

Recent MSc Artificial Intelligence graduate from the University of East London seeking a funded PhD opportunity in artificial intelligence, machine learning, and FinTech. I am particularly interested in research that applies predictive modelling, interpretable machine learning, and decision-support systems to complex real-world problems in healthcare, operational systems, financial crime analytics, and public-sector innovation. Through doctoral research, I aim to contribute original, publication-quality work that advances both methodological understanding and practical AI deployment for societal benefit.

## RESEARCH INTEREST

*Machine Learning, Artificial Intelligence, Explainable AI, Predictive Modelling, Decision-Support Systems, Financial Crime Analytics, FinTech, Healthcare AI, Operational Analytics, Natural Language Processing (NLP), Computer Vision, Deep Learning, Neural Networks, Human-Computer Interaction (HCI), and Public-Sector AI.*

## EDUCATION

- **Master of Science in Artificial Intelligence** January 2025 – May 2026  
*University of East London* London, United Kingdom
  - Overall performance: Distinction-level results across all completed modules.
  - Dissertation: **CN7000: Mental Wealth; Professional Life (Dissertation)** – 98%.
  - Relevant Modules: **CN7031: Big Data Analytics** – 88%, **CN7050: Intelligent Systems** – 95%, **CN7023: Artificial Intelligence & Machine Vision** – 87%, **CN7030: Machine Learning on Big Data** – 95%.
- **Bachelor of Science in Computer Science and Engineering** January 2019 – November 2022  
*University of Liberal Arts Bangladesh* Dhaka, Bangladesh
  - CGPA: **3.65/4.00**.
  - Key Modules: **Artificial Intelligence, Software Engineering, Computer Security, Data Structures, Algorithms, Database Systems, Operating Systems, Computer Networks, and Web Technology.**
  - Final Year Project: **CSE499: Grade: A.**

## RESEARCH EXPERIENCE

- **Research Assistant** January 2025 – Present  
*Under Dr. Fahimeh Jafari, University of East London (UEL)* [!\[\]\(564903337f30b845a5f6979939a95fe6\_img.jpg\)](#) London, United Kingdom
  - **NHS Collaboration:** Contributed to multiple applied AI research projects involving NHS-related data, with a focus on emergency care analytics, unplanned hospital readmissions, patient-flow improvement, and healthcare decision support.
  - **Knowledge Exchange Funding:** Contributed to a UEL **Knowledge Exchange Project Funding** project focused on developing data-driven solutions to help reduce avoidable hospital readmissions and improve healthcare service efficiency.
  - **Publications:** Co-authored and contributed to several research papers under Dr. Jafari's supervision, including work on explainable AI, healthcare analytics, operational delay prediction, and AI-driven decision-support systems.
- **Research Assistant** January 2024 – July 2024  
*Under Professor Nafees Mansoor, Ph.D., SMIEEE, CSE Department, ULAB* [!\[\]\(6799d2cf9a6546bbe2fea4f3991acfa2\_img.jpg\)](#) Dhaka, Bangladesh
  - Conducted literature reviews, collected academic sources, and summarised findings to support research activities in computer science and engineering.
  - Assisted with data collection, validation, statistical analysis, and report preparation.
  - Collaborated with senior researchers on research planning, evidence synthesis, and academic documentation.

## INDUSTRY EXPERIENCE

---

### • Data Analyst

Brother Marcus Ltd [🌐]

September 2025 – June 2026

London, United Kingdom

- **Reporting Automation:** Automated the weekly data reporting process for service performance and sales analysis, improving the speed, consistency, and reliability of business reporting.
- **Service and Sales Reports:** Developed weekly reports covering service performance, sales trends, late orders, restaurant-level comparisons, and operational KPIs to support management decision-making.
- **Operational Data Analysis:** Analysed multi-site restaurant performance data to identify trends, service bottlenecks, sales patterns, and areas for operational improvement.
- **Dashboard and KPI Development:** Created dashboard-style reports and key performance indicators to communicate insights clearly to stakeholders and support data-driven decisions.
- **MSc Dissertation Data Support:** Used company-supported operational data for my MSc Artificial Intelligence dissertation, developing an explainable AI decision-support framework for service-delay prediction and table-turnover optimisation.
- **Stakeholder Communication:** Translated complex operational data into clear, actionable insights for management, helping improve service monitoring and weekly performance review processes.

### • Data Engineer

SuperAnnotate [🌐]

February 2024 – January 2025

USA, Remote

- **AI Technical Data Training:** Worked on diverse large language model and machine learning datasets, providing high-quality labelled data to support model development and improvement.
- **Data Quality Assessment:** Promoted to quality control responsibilities, assessing the accuracy, consistency, and reliability of labelled datasets across multiple AI training projects.
- **Large-Scale LLM Project Experience:** Contributed to seven large-scale AI data training projects, including Project Summer, Puzzle, Cocktail, Multimodal Web, Octopus, and Milkyway.
- **Model Improvement Support:** Supported AI model improvement by ensuring annotation quality, dataset consistency, and reliable data inputs for training and evaluation workflows.

### • Data Engineer (Contract)

Quantigo AI [🌐]

September 2024 – December 2024

USA, Remote

- **Data Annotation and Labelling:** Supported machine learning and computer vision projects through accurate data annotation, labelling, and dataset preparation.
- **Quality Control and Consistency:** Ensured accuracy and consistency in labelled datasets, contributing to reliable model training workflows and improved data quality.
- **Practical Machine Learning Support:** Gained hands-on experience supporting machine learning and computer vision applications through structured and precise data preparation.

### • Junior Software Engineer

M360 ICT [🌐]

August 2023 – December 2023

Dhaka, Bangladesh

- **Software Development:** Contributed to software development tasks, system updates, and technical implementation for web-based and business-focused digital solutions.
- **AI Technology Integration:** Supported the adoption of AI-enabled tools and intelligent solutions to enhance software functionality, streamline operations, and improve user experience.
- **OTA Project Contribution:** Worked on the Trabil OTA project, supporting development activities, task coordination, and delivery of project milestones.
- **Industry Collaboration:** Collaborated with Sabre Bangladesh through training sessions and technical discussions to support travel-technology integration and project development.

### • Junior Web Developer

South Asian Builders & Technologies Ltd. [🌐]

January 2023 – July 2023

Dhaka, Bangladesh

- **Web Development:** Designed, developed, and maintained website components to improve the company's online presence and provide a smooth user experience.
- **Front-End and Back-End Support:** Assisted with front-end design, content updates, website maintenance, and basic back-end functionality.
- **Graphic Design:** Created social media posters, banners, and promotional materials to improve brand visibility and audience engagement.
- **3D Rendering:** Used Autodesk 3DS to produce architectural renderings for building projects and marketing materials.

## TEACHING EXPERIENCE

---

- **Teaching Assistant** February 2022 - October 2022  
*Department of Computer Science, University of Liberal Arts Bangladesh [🌐]* Dhaka, Bangladesh
  - **Teaching and Curriculum Development:** Successfully led classes in the teacher's absence, ensuring a smooth and engaging learning experience for students. Assisted the CSE department in developing the new curriculum based on UGC guidelines, contributing valuable insights and expertise.
  - **Classroom Support:** Assisted professors in classroom management and supported students across multiple subjects, including Algorithms, Machine Learning, Web Technology, Introduction to Programming, Digital Logic Design, DBMS, .NET Programming, and Java.
  - **Tutoring and Student Improvement:** Conducted tutoring sessions, resulting in notable improvements in student performance and understanding.
- **Teaching Assistant** December 2019 - October 2020  
*Center for Excellence in Teaching and Learning, ULAB [🌐]* Dhaka, Bangladesh
  - **Assisting Professor:** Assisted Professor in delivering conference and classroom lectures on teaching methods and sustainable development.
  - **Workshop Organizer:** Volunteered as an organizer for various workshops, actively contributing to the planning and execution of events. Assisted during workshops and events, supporting smooth operations and a positive learning environment
  - **Social Media Coordinator:** Managed the Facebook and LinkedIn pages, developing and implementing strategies to increase engagement and online presence. Utilized graphic design skills to create visually appealing posters and promotional materials tailored for social media.

## SELECTED PROJECTS

---

- **An Explainable AI Decision-Support Framework for Service Delay Prediction in Multi-Restaurant Operations**  
*MSc Artificial Intelligence Dissertation, University of East London [Python, Machine Learning, XGBoost, SHAP, Pandas]*
  - Developed an explainable AI decision-support framework to predict food service delay, drinks service delay, order completion delay, and table turnover delay using transaction-level restaurant data.
  - Applied leakage-aware feature engineering, machine learning classification models, and SHAP-based explainability to identify operational factors associated with service-delay risk.
  - Used multi-restaurant operational data supported by Brother Marcus Ltd to generate practical insights for service optimisation and table-turnover improvement.
- **Design and Implementation of an AI Agent for Brother Marcus Restaurants Using Agentic AI Workflow**  
*CN7050 Intelligent Systems Coursework, University of East London [Agentic AI, Python, LLMs, Workflow Design]*
  - Designed and implemented an AI agent workflow for Brother Marcus Restaurants to support intelligent restaurant-data analysis and operational decision-making.
  - Developed an agentic workflow capable of interpreting restaurant performance data, identifying service and revenue patterns, and producing management-oriented insights.
  - Focused on practical AI deployment for hospitality operations by combining intelligent systems design with real-world business analytics requirements.
- **Automated Service and Revenue Reporting Tool for Brother Marcus Restaurants**  
*Industry Project, Brother Marcus Ltd [Python, Flask, SQL, APIs, Report Automation]*
  - Built an automated reporting tool to analyse restaurant data and generate weekly service and revenue reports for management.
  - Automated reporting on key operational indicators, including service performance, late orders, sales trends, revenue patterns, and restaurant-level comparisons.
  - Reduced manual reporting effort by transforming raw operational data into structured, repeatable, and management-ready weekly reports.
- **Goayer.com: Flight Booking and OTA Platform Using Sabre API**  
*Associated with M360 ICT [Flask, REST APIs, Redis, Sabre API]*
  - Contributed to the development of Goayer.com, a user-friendly flight booking and online travel agency platform designed to simplify travel planning and booking.
  - Integrated Sabre API-based workflows to support real-time flight search, flight details, fare revalidation, PNR creation, and booking functionality.
  - Helped build REST API-driven backend features to connect users with real-time flight, hotel, car rental, and travel-service data.
  - Supported the development of a travel technology platform focused on competitive pricing, flexible search, seamless booking, and reliable customer experience.
- **EveCode: A Learning Management System with Built-in Compiler and File Management**  
*BSc Graduation Project [Laravel, PHP, Bootstrap, MySQL]* 
  - Developed a learning management system to support coding education, including an in-built compiler for C, C++, PHP, JavaScript, and Python.
  - Implemented course management, file handling, coding practice, and real-time output features to support students and academic organisations.

## CERTIFICATIONS

---

- **International English Language Testing System (IELTS) : British Council**  
Overall Band 7.0 (Reading 7.5, Speaking 7.0, Writing 6.5, Listening 6.5) June 2023
- **Business and Social English Course : British Council** October 2024
- **Machine Learning Specialization : DeepLearning.AI** July 2023
- **Python for Everybody Specialization : University of Michigan** August 2023
- **Graphic Design Specialization : California Institute of the Arts** July 2023
- **Web Design for Everybody: Web Development Specialization : University of Michigan** June 2023

## SKILLS

---

- **Programming Languages:** Python, Java, C++, C#, JavaScript, SQL
- **Data Science & Machine Learning:** Scikit-Learn, XGBoost, TensorFlow, Keras, PyTorch, Pandas, NumPy, SciPy, Matplotlib
- **Explainable AI & Model Evaluation:** SHAP, Feature Importance Analysis, Classification Metrics, ROC-AUC, PR-AUC, MCC, Class Imbalance Handling, Threshold Tuning
- **AI & Research Areas:** Machine Learning, Explainable AI, Deep Learning, Predictive Modelling, Decision-Support Systems, NLP, Computer Vision, Healthcare AI, FinTech, Financial Crime Analytics
- **Data Engineering & Databases:** MySQL, PostgreSQL, MongoDB, SQLAlchemy, REST APIs, Data Cleaning, Feature Engineering, ETL, Automated Reporting
- **Web & Dashboard Technologies:** HTML, CSS, Bootstrap, React, NodeJS, Flask, ApexCharts, Streamlit
- **Cloud, DevOps & Version Control:** Git, GitHub, Hugging Face, AWS, Azure
- **Reporting & Productivity Tools:** Jupyter Notebook, Google Colab, Kaggle, VS Code, LaTeX, Excel, ReportLab, Power BI, Tableau
- **Data Labelling & Annotation Tools:** SuperAnnotate, CVAT, LabelImg, Supervisely, Encord, SuperbAI
- **Project & Collaboration Tools:** Jira, Trello, Slack, Microsoft Teams, Google Workspace
- **Research Skills:** Literature Review, Experimental Design, Data Analysis, Scientific Writing, Manuscript Preparation, Reviewer Response Writing, Academic Presentation

## HONORS AND AWARDS

---

- **Knowledge Exchange Project Funding** January 2026  
*University of East London, issued by Dr. Fahimeh Jafari*
  - Contributed to a funded Knowledge Exchange project addressing the NHS challenge of unplanned hospital readmissions.
  - The project focuses on developing data-driven and evidence-based solutions to reduce avoidable readmissions, improve patient outcomes, and strengthen healthcare service efficiency.
  - Supported the translation of academic AI research into practical healthcare impact through collaboration between university research and real-world healthcare needs.
- **UEL FinTech Hackathon 2025 – First Prize Winner** April 2025  
*University of East London, Centre of FinTech*
  - Secured First Prize at the UEL FinTech Hackathon organised by the Centre of FinTech at the University of East London.
  - Developed **EcoTrack**, a sustainable banking solution designed to help users and banks track and reduce carbon footprint in real time.
  - Proposed features including AI-powered sustainability tips, CO<sub>2</sub> reduction insights, blockchain-secured rewards, donation tracking, and ESG impact dashboards.
- **International Students Merit-Based Scholarship** January 2025  
*University of East London*
  - Awarded a merit-based scholarship by the University of East London in recognition of academic achievement as an international student.
- **2025 Google Certification Program** February 2025  
*Google, associated with University of East London*
  - Selected for / participated in the 2025 Google Certification Program associated with the University of East London.
  - Developed additional professional and technical skills through Google-supported certification training.

- Business and Social English Course Scholarship** June 2024  
*British Council, FutureNation*
  - Awarded scholarship-supported training in professional and social English communication.
  - Completed British Council training focused on business communication, workplace interaction, and confident spoken English.
- Grow with Google Scholarship Program** October 2021  
*The Commonwealth of Learning, Google* 
  - Completed career-oriented training in digital skills, data analytics, web development, and professional development.
  - Gained practical knowledge to support growth in technology-focused academic and professional pathways.
- Coursera Workforce Recovery Program** May 2020  
*The Commonwealth of Learning, Coursera* 
  - Participated in the Coursera Workforce Recovery Program supported by The Commonwealth of Learning.
  - Completed online professional development courses in areas including data analysis, digital skills, and software development.

## LEADERSHIP EXPERIENCE

---

- Lead Engineer on OTA Trabil / Goayer Project** August 2023 – December 2023  
*M360 ICT* 
  - Led technical development activities for the Trabil / Goayer online travel agency platform, supporting flight search, fare revalidation, PNR creation, and booking workflows.
  - Coordinated API-driven backend development using Flask, REST APIs, Redis, and Sabre API integration to support real-time travel booking functionality.
  - Worked with the development team to manage project tasks, resolve technical issues, and deliver travel-technology features within project timelines.
- Lead Technical AI Data Trainer** February 2024 – April 2024  
*SuperAnnotate* 
  - Led work on the Puzzle Extraction project, training AI systems to identify and extract structured information from Wikipedia articles into JSON format.
  - Supported and guided data trainers to maintain consistency, quality, and efficiency in annotation and data-preparation tasks.
  - Worked closely with AI engineers by providing feedback on labelling strategies, dataset quality, and model training requirements.
- FinTech Hackathon Winning Team Lead** April 2025  
*University of East London, Centre of FinTech*
  - Contributed to the winning team at the UEL FinTech Hackathon 2025 through the development of **EcoTrack**, a sustainable banking and ESG-focused FinTech solution.
  - Supported the design of AI-powered carbon tracking, CO<sub>2</sub> reduction insights, blockchain-secured rewards, donation tracking, and ESG impact dashboard features.
  - Helped present the business and technical value of the solution, linking sustainable finance, user behaviour, and ESG reporting.

## PROFESSIONAL MEMBERSHIPS

---

- ORCID**, ORCID ID: 0009-0001-8455-5550 March 2022
- IEEE Membership**, Membership ID: 98329279 March 2022
- IEEE Computer Society Membership**, Membership ID: 98329279 March 2022
- IEEE Young Professionals**, Membership ID: 98329279 March 2022

## VOLUNTEER EXPERIENCE

---

### • Sustainability Volunteer

April 2025 – Present

University of East London Students' Union

- Selected as a Sustainability Volunteer to support student-led sustainability campaigns and community engagement activities.
- Contributing to initiatives including community gardening, sustainable cooking lessons, bike training for students, and awareness campaigns.
- Supporting sustainability-focused events aimed at encouraging environmentally responsible behaviour within the university community.

### • Academic Events and Workshop Volunteer

January 2020 – September 2022

University of Liberal Arts Bangladesh

- Volunteered at multiple academic seminars and workshops, including Cyber Security, IT Career Opportunities in Japan, LaTeX for Scientific Research Writing, Quality Teaching and Learning, and Moodle Training.
- Assisted with event coordination, participant support, technical setup, workshop logistics, and communication with attendees.
- Supported academic knowledge-sharing activities across computing, teaching, research writing, and digital learning themes.

### • Volunteer Staff

January 2009 – December 2012

Bangladesh Scouts

- Participated in community service, discipline-building activities, teamwork exercises, and youth development programmes.
- Supported local volunteering activities focused on responsibility, leadership, public service, and community engagement.
